

The First KEK-KIAS-NCTS Joint Workshop on Particle Physics Phenomenology

May 26th-28th, 2016

NCTS Lecture Room A, 4F, 3rd General Building, NTHU

Introduction

The main purpose is to bring together theorists (faculties, postdocs and PhD students) from different institutes to report their latest research findings. Through interactions in the workshop, we hope to generate new ideas for further explorations and provide unique opportunities for collaborations among members of different institutes. In this very first meeting, we will focus on the topics in the area of phenomenology and cosmology, while other formal topics may be included in the future workshops.
